Carmen,

Here is some information regarding highlands groundwater:

Harris County and EPA have been working closely together on site & community issues; thanks for offer, but no need to weigh in with Harris County.

Harris County is currently sampling wells to determine whether any ground water issues exist; approximately 104 water wells located in the Lynchburg and San Jacinto Oaks areas of Highlands Texas are being sampled.

Harris County is collecting the samples this week, and expects that the results will be available from the lab approximately one month after sampling is completed.

Regards,

Gary Miller

Do you know how I can answer the comments in blue? I sent an answer to David G, but he said it did not address the comments. Here is what I tried: I need MORE! Thanks, guys. Carmen

At the last public meeting, Harris County said they were going to sample some wells. For more information, please contact the Director, Bob Allen:

Subject: a little help

Hi, Gary and Donn. David G has been responding to questions about SJ with the Mayor's DC rep. He has addressed all their questions, except for this:

Highlands groundwater contamination status - Mayor DonCarlos was very willing to weigh in with Harris County if need be. seems like there was an exchange during our conference call discussion about the Highlands area as well and maybe some follow-up with Harris County and I just wanted to make sure we were doing that as well since the Mayor offered to be helpful if you weren't getting the response needed in a timely manner?

Can you help me with this answer, please? Thanks. Carmen

Sincerely,

Carmen Assunto
